

# Small Part Spray Booth AirBox Mini 750, 1500

## GESCHA Small Part Spray Booth AirBox 750, 1500

### Simple, but efficient

GESCHA AirBox is made from solid galvanized steel and can be delivered in two standard sizes. All booths are **equipped with an environmental protective dual filter system**. By taking out the front grit, the filters can be changed fast and easy anytime.

The fan is direct driven by an explosion proof motor. The air intake is from the front and is taken out the back top after being filtered. The air stream can be adjusted individually through a damper, which is included in the paint booth.

The GESCHA AirBox is available on an optional undercarriage with wheels. Other sizes and special models are available upon request. Our technicians will be available for further information and assistance.

GESCHA AirBox 750 incl. undercarriage

### Technical information

- stable steel construction
- environmental friendly: dual GESCHA filter system
- high performance ventilator in a casing, direct driven by explosion proof motor (ex zones: 1 and 2)
- two standard work widths are available: 750 mm and 1500 mm
- Optional ready to use with plug and motor protection, ducting and replacement filters

**For cleaning the casing**, we recommend our special GESCHA cleaning grease on Teflon basis or out strippable coating, which allows dirt to be removed easy and surface protecting.

Height adjustable undercarriage (optional)

Ready to use electrical connection (optional)
